PDF file test

This is just a pdf file example to test the comparison python application:

- This is the first line
- This is the third line
- And this is another line.
- This line is extra line for test.
- This is another line eather
- This is the second line
- This is the third line
- And this one too, let's see if it worked.
- This is the fourth line

This is other paragraph for testing purposes I don't know what happening with me right now but that crazy mad.
